

OUR SCIENCE PRINCIPLES

We **ASK QUESTIONS**, carry out investigations and have the confidence to explore new things!

We **ARE CURIOUS** in Science because our topics are interesting and fun!

We **USE A RANGE OF PRACTICAL EQUIPMENT** and our amazing outside classroom to explore!

We **UNDERSTAND** that we can relate science to our everyday lives!

We **USE PRECISE SCIENTIFIC VOCABULARY** to show our understanding of the different topics.

OUR SCIENCE VISION

Our vision at Barley Barkway Federation is to encourage **curiosity** and **confidence** in all children to think, question and explain their ideas and see themselves as Scientists.

We use a range of strategies and resources to inspire children to gain procedural knowledge and make connections with other areas of their learning.
